1-877-789-7789 or visit [www.vanfax.com](http://www.vanfax.com)

**INDUSTRY AND MARKET INFORMATION**

**Did you know?**

When re-calibrating a vehicle's ADAS camera the required consistent voltage for success during this process is most often more than 12 volts. Here are a few examples of OE-specified voltage for re-calibration.

<b>Acura</b>	Above 12V - Ideal target is 13.5V
<b>Audi</b>	12.8V-14.2V
<b>Chevrolet</b>	13.4V
<b>Hyundai</b>	13.5V
<b>Porsche</b>	13.5-14.5V - Ideal target is 14.2V
<b>Volkswagen</b>	12.8V-14.2V

**VEHICLE CALIBRATION: COMMITTING IN-HOUSE**
